

Linda Lear Email Interview

Where there any particularly profound articles written opposing Rachel Carson and “Silent Spring”?

there were many articles written against her most by the Nutrition Foundation and the food lobby who opposed her because they feared their cash flows would be impacted by people who thought there would be pesticides used in farming and food processing. Of course.

What is the biggest Impact of “Silent Spring”?

The biggest impact was that the book raised public consciousness about the human/nature relationship AND what we were doing to the natural world carelessly.
